## Section 1. Identification

| Product name | $:$ BULK TOLUENE SHOE GOO |
| :--- | :--- |
| Product code | $: 1000070$ |

Relevant identified uses of the substance or mixture and uses advised against
Identified uses
Adhesive.

| Supplier's details | : Eclectic Products LLC 1075 Arrowsmith Eugene, OR 97402 541-484-9621 |
| :---: | :---: |
| Responsible name | Regulatory Affairs |
| Emergency telephone number (with hours of operation) | : INFOTRAC <br> 1-800-535-5053 $001-352-323-3500$ <br> 24 hours per day, 7 days per week. |

## Section 2. Hazards identification

OSHA/HCS status
Classification of the substance or mixture
: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
: FLAMMABLE LIQUIDS - Category 2
ACUTE TOXICITY (oral) - Category 4
SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
TOXIC TO REPRODUCTION (Unborn child) - Category 2
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) -
Category 3
SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2
GHS label elements
Hazard pictograms

Signal word
Hazard statements
:

: Danger
: H225 - Highly flammable liquid and vapor.
H302 - Harmful if swallowed.
H319-Causes serious eye irritation.
H315-Causes skin irritation.
H361-Suspected of damaging the unborn child.
H336-May cause drowsiness or dizziness.
H373 - May cause damage to organs through prolonged or repeated exposure.

## Section 2. Hazards identification

| Prevention | : P201-Obtain special instructions before use. <br> P202 - Do not handle until all safety precautions have been read and understood. <br> P280 - Wear protective gloves. Wear eye or face protection. Wear protective clothing. <br> P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. <br> P241 - Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. <br> P242 - Use only non-sparking tools. <br> P243 - Take precautionary measures against static discharge. <br> P233 - Keep container tightly closed. <br> P271- Use only outdoors or in a well-ventilated area. <br> P260 - Do not breathe vapor. <br> P270 - Do not eat, drink or smoke when using this product. <br> P264 - Wash hands thoroughly after handling. |
| :---: | :---: |
| Response | : P314-Get medical attention if you feel unwell. <br> P308 + P313-IF exposed or concerned: Get medical attention. <br> P304 + P340 + P312 - IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. <br> P301 + P312 + P330-IF SWALLOWED: Call a POISON CENTER or physician if you feel unwell. Rinse mouth. <br> P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. <br> P302 + P352 + P362+P364-IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. <br> P332 + P313 - If skin irritation occurs: Get medical attention. <br> P305 + P351 + P338-IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. <br> P337 + P313 - If eye irritation persists: Get medical attention. |
| Storage | : P405-Store locked up. <br> P403-Store in a well-ventilated place. <br> P235 - Keep cool. |
| Disposal | : P103-Read label before use. <br> P102 - Keep out of reach of children. <br> P101 - If medical advice is needed, have product container or label at hand. |
| Hazards not otherwise classified | : None known. |

## Section 3. Composition/information on ingredients

## Substance/mixture : Mixture

| Ingredient name | $\%$ | CAS number |
| :--- | :--- | :--- |
| toluene | $\geq 25-\leq 50$ | $108-88-3$ |
| Styrene, 1,3-butadiene polymer | $\geq 25-\leq 50$ | $9003-55-8$ |
| Solvent naphtha (petroleum), light aliph. | $\geq 10-\leq 25$ | $64742-89-8$ |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.
There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.
Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

## Description of necessary first aid measures

| Eye contact | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. |
| :---: | :---: |
| Inhalation | Remove person to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | Wash out mouth with water. Remove dentures if any. Remove person to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

## Most important symptoms/effects, acute and delayed

## Potential acute health effects

| Eye contact | : Causes serious eye irritation. |
| :--- | :--- |
| Inhalation | : Can cause central nervous system (CNS) depression. May cause drowsiness or |
|  | dizziness. |
| Skin contact | : Causes skin irritation. |
| Ingestion | : Harmful if swallowed. Can cause central nervous system (CNS) depression. |

## Over-exposure signs/symptoms

| Eye contact | Adverse symptoms may include the following: pain or irritation watering redness |
| :---: | :---: |
| Inhalation | Adverse symptoms may include the following: nausea or vomiting headache drowsiness/fatigue dizziness/vertigo unconsciousness reduced fetal weight increase in fetal deaths skeletal malformations |
| Skin contact | Adverse symptoms may include the following: irritation redness reduced fetal weight increase in fetal deaths skeletal malformations |

## Section 4. First aid measures

Ingestion
: Adverse symptoms may include the following:
reduced fetal weight
increase in fetal deaths
skeletal malformations

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician

Specific treatments
Protection of first-aiders
: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
: No specific treatment.
: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

## See toxicological information (Section 11)

## Section 5. Fire-fighting measures

## Extinguishing media

Suitable extinguishing media
Unsuitable extinguishing media

Specific hazards arising from the chemical

Hazardous thermal decomposition products

Special protective actions for fire-fighters

Special protective equipment for fire-fighters
: Use dry chemical, CO2, water spray (fog) or foam.
: Do not use water jet.
: Highly flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back.
: Decomposition products may include the following materials: carbon dioxide carbon monoxide
: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

## Personal precautions, protective equipment and emergency procedures

For non-emergency personnel
: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".

## Section 6. Accidental release measures

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

## Methods and materials for containment and cleaning up

Small spill

Large spill
: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

## Precautions for safe handling

Protective measures

Advice on general occupational hygiene
: Put on appropriate personal protective equipment (see Section 8). Avoid exposure obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities
: Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

## Section 8. Exposure controls/personal protection

## Control parameters

Occupational exposure limits

| Ingredient name | Exposure limits |
| :--- | :--- |
| toluene | NIOSH REL (United States, 10/2016). |
|  | STEL: $560 \mathrm{mg} / \mathrm{m}^{3} 15$ minutes. |
|  | STEL: 150 ppm 15 minutes. |
|  | TWA: $375 \mathrm{mg} / \mathrm{m}^{3} 10$ hours. |
|  | TWA: 100 ppm 10 hours. |
|  | OSHA PEL Z2 (United States, 2/2013). |
|  | AMP: 500 ppm 10 minutes. |
|  | CEIL: 300 ppm |
|  | TWA: 200 ppm 8 hours. |
|  | ACGIH TLV (United States, 3/2017). |
|  | TWA: 20 ppm 8 hours. |
|  | OSHA PEL 1989 (United States, 3/1989). |
|  | Notes: See Table Z-2. |
|  | STEL: $560 \mathrm{mg} / \mathrm{m}^{3} 15$ minutes. |
| Styrene, 1,3-butadiene polymer 150 ppm 15 minutes. |  |
| Solvent naphtha (petroleum), light aliph. | TWA: $375 \mathrm{mg} / \mathrm{m}^{3} 8$ hours. |
|  | TWA: 100 ppm 8 hours. |
|  | None. |
|  | None. |

controls

## Environmental exposure controls

Appropriate engineering : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## Individual protection measures

| Hygiene measures | $:$Wash hands, forearms and face thoroughly after handling chemical products, before <br> eating, smoking and using the lavatory and at the end of the working period. <br> Appropriate techniques should be used to remove potentially contaminated clothing. <br> Wash contaminated clothing before reusing. Ensure that eyewash stations and safety <br> showers are close to the workstation location. <br> Eye/face protection <br> :Safety eyewear complying with an approved standard should be used when a risk <br> assessment indicates this is necessary to avoid exposure to liquid splashes, mists, <br> gases or dusts. If contact is possible, the following protection should be worn, unless <br> the assessment indicates a higher degree of protection: chemical splash goggles. <br> Hand protection$\quad$: Chemical-resistant, impervious gloves complying with an approved standard should be <br> worn at all times when handling chemical products if a risk assessment indicates this is <br> necessary. Considering the parameters specified by the glove manufacturer, check <br> during use that the gloves are still retaining their protective properties. It should be <br> noted that the time to breakthrough for any glove material may be different for different <br> glove manufacturers. In the case of mixtures, consisting of several substances, the <br> protection time of the gloves cannot be accurately estimated. |
| :--- | :--- |

## Section 8. Exposure controls/personal protection

## Body protection

Other skin protection

Respiratory protection
: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

## Section 9. Physical and chemical properties

| Appearance |  |
| :---: | :---: |
| Physical state | Liquid. [Gel] |
| Color | Clear. |
| Odor | Not available. |
| Odor threshold | Not available. |
| pH | Not available. |
| Melting point | Not available. |
| Boiling point | $114.44^{\circ} \mathrm{C}\left(238^{\circ} \mathrm{F}\right)$ |
| Flash point | Closed cup: $-0.55556^{\circ} \mathrm{C}\left(31^{\circ} \mathrm{F}\right)$ [Setaflash. ASTM D3828] |
| Evaporation rate | $<1($ ether (anhydrous) = 1) |
| Flammability (solid, gas) | Not available. |
| Lower and upper explosive (flammable) limits | Not available. |
| Vapor pressure | Not available. |
| Vapor density | >1 [Air = 1] |
| Relative density | 0.97 |
| Partition coefficient: n octanol/water | Not available. |
| Auto-ignition temperature | Not available. |
| Decomposition temperature | Not available. |
| Viscosity | Dynamic (room temperature): 145000 to $200000 \mathrm{mPa} \cdot \mathrm{s}$ ( 145000 to 200000 cP ) |
| Flow time (ISO 2431) | Not available. |

## Section 10. Stability and reactivity

## Reactivity

## Chemical stability

Possibility of hazardous reactions

Conditions to avoid : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.

## Section 10. Stability and reactivity

Incompatible materials

Hazardous decomposition products
: Reactive or incompatible with the following materials: oxidizing materials
: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## Section 11. Toxicological information

## Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
| :--- | :--- | :--- | :--- | :--- |

## Section 13. Disposal considerations

Disposal methods
: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

New York
New Jersey : The following components are listed: TOLUENE; BENZENE, METHYL-; Solvent Naphtha
Pennsylvania : The following components are listed: BENZENE, METHYL-; Solvent Naphtha

## California Prop. 65

WARNING: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.

| Ingredient name | Cancer | Reproductive | No significant risk <br> level | Maximum <br> acceptable dosage <br> level |
| :--- | :--- | :--- | :--- | :--- |
| Toluene | No. | Yes. | - | Yes. |

## International regulations

## Chemical Weapon Convention List Schedules I, II \& III Chemicals

Not listed.

## Montreal Protocol (Annexes A, B, C, E)

Not listed.

## Stockholm Convention on Persistent Organic Pollutants

Not listed.
Rotterdam Convention on Prior Informed Consent (PIC)
Not listed.

## UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.
Inventory list
Australia : All components are listed or exempted.
Canada : All components are listed or exempted.
China : All components are listed or exempted.
Europe : Not determined.
Japan : Japan inventory (ENCS): Not determined. Japan inventory (ISHL): Not determined.

## Section 16. Other information

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.
The customer is responsible for determining the PPE code for this material. For more information on HMIS ${ }^{8}$ Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

This reprinted material is not the complete and official position of the National Fire Protection Association, on the referenced subject which is represented only by the standard in its entirety.

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.
Procedure used to derive the classification

| Classification | Justification |
| :--- | :--- |
| FLAMMABLE LIQUIDS - Category 2 | On basis of test data |
| ACUTTE TOXICITY (oral) - Category 4 | Calculation method |
| SKIN IRRITATION - Category 2 | Calculation method |
| EYE IRRITATION - Category 2A | Calculation method |
| TOXIC TO REPRODUCTION (Unborn child) - Category 2 | Calculation method |
| SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - | Calculation method |
| Category 3 | Calculation method |
| SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2 | (RET |

## Section 16. Other information

History

Date of issue/Date of : 2/22/2018 revision

Version
Key to abbreviations
: 1.01
: ATE = Acute Toxicity Estimate
BCF = Bioconcentration Factor
GHS = Globally Harmonized System of Classification and Labelling of Chemicals
IATA = International Air Transport Association
IBC = Intermediate Bulk Container
IMDG = International Maritime Dangerous Goods
LogPow = logarithm of the octanol/water partition coefficient MARPOL = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution) UN = United Nations
