

# Embroidery Hoop Ornament DIY

*A Project Featuring*

**UNICORN  
SPiT**

**E6000**

## Supplies:

- 4 inch wood embroidery hoop
- 6 x 6 inch designer fabric square
- **E6000 Industrial Strength Adhesive**
- **Unicorn SPiT Gel Stain** (color of choice)
- Scissors
- Sewing pins or marker
- Craft paint brush/water
- Ribbon or jute
- Embellishments (optional)

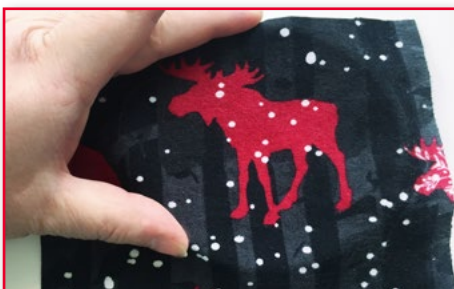

**Step 1:** Loosen embroidery hoop adjustment screw and separate into two parts (set the inner hoop aside).

**Step 2:** Stain the outer hoop completely with Unicorn SPiT (SPiT can be diluted with water). Set aside and allow to dry.

*Unicorn SpIt color shown in Squirrel*

**Step 3:** Place the **inner** hoop on a protected work surface (such as wax paper).

Lay the fabric square (right side up) over the inner hoop and center the design. Holding the fabric securely in place, flip over the hoop & fabric. Mark the position of the fabric around the outside of the hoop with a marker or pins.

**Step 4:** Apply a line of E6000 adhesive to one side of the thin rim of the inner embroidery hoop. Then firmly place the hoop (glue side down) on to the fabric where you marked it previously. Carefully, pick up both the hoop and fabric together and flip them over. Look to see if the design is still centered (if it is not, the fabric can be adjusted slightly while the E6000 is still wet). Now place the outer hoop over the inner, keeping the fabric in position. Gently tug the extra fabric tight around all edges, while keeping the design centered. Allow E6000 to fully cure per package instructions.

**Step 5:** After the E6000 has cured, trim extra fabric as close as possible around the back of the hoop. Embellish as desired. Apply appliques, fabric cutouts, bows, jewels or whatever you like, using E6000 adhesive.

**Step 6:** Create a hanger from jute or a ribbon. Thread through the top and knot. Glue a bow on the top for an added touch.
