

Rustic Wood Ornaments DIY

A Project Featuring

**UNICORN
SPiT®**

Supplies:

- Wood tree rounds (pre-drilled for hanger)
- **UNICORN SPiT Midnight's Blackness and White Ning**
- Clear matte-finish spray sealer (non-water-based)
- Foam stamps (assorted designs of choice)
- Paintbrush (round tip is best)
- Sandpaper (fine grit)
- Flat paint tray or paper plate

Step 1: Lightly sand the front of each wood round to a smooth finish. Brush away any dust.

Step 2: Apply a smooth, even coat of Unicorn SPiT Midnight's Blackness on the inside area of the round (up to the bark edge). Leave the bark edge natural. Allow to dry for approximately 30 minutes. If desired, apply additional coats and let dry.

Step 3: Spray the stained rounds with a light coat of a matte-finish spray sealer. Allow to dry according to manufacturer's directions. (This step allows an imperfect stamp to be reworked without removing the base coat.)

Step 4: Pour a small amount of Unicorn SPiT White Ning onto a paint tray/paper plate. Smooth it out to create an even puddle wide enough to accommodate the entire stamp. (TIP: Practice applying the paint-coated stamp onto a disposable work surface before applying to the wood round. This will enable you to get a feel for how much paint is needed to get a clean impression.) Press the paint-coated stamp onto the center of the round using even pressure. Lift off the stamp straight up to avoid smudges.

Paint dashes, dots or your design of choice around the edge. Allow the project to dry completely.

Step 5: Spray the wood round with an additional coat of sealer. Allow to dry according to manufacturer's directions.

Step 6: Attach a hanger or string. Hang on your tree to enjoy! Paint a whole set and give them as gifts.
